Fiche Reference

INTRODUCTION

The 1976 Census-Microfiche Series is an information system produced by the Information Management Section of the Regional Planning Division using the special tabulation services provided by Statistics Canada.

The system has been designed to provide users with massive amounts of Census information in a form that is easily stored and accessed.

A selection of material from the 1976 Census was made based on a study of needs made within the Planning Department. This data was then reduced 48 times using modern technology and stored on small plastic films called microfiche, or "fiche". Each fiche is capable of storing roughly 270 pages of information plus an index. About 30,000 pages of information have been put together for this project.

HOW TO USE THE SYSTEM

General Instructions

Three separately bound volumes have been prepared as part of this system. They are:

Volume 1: USERS' GUIDE

Volume 2: REFERENCE MAPS

Volume 3: 1976 CENSUS TABULATIONS

The *Users' Guide* provides descriptions of the data, geographic areas, the necessary index references to access information, and instructions on how to retrieve information.

Reference Maps show all the geocoded areas for which tabulations are available.

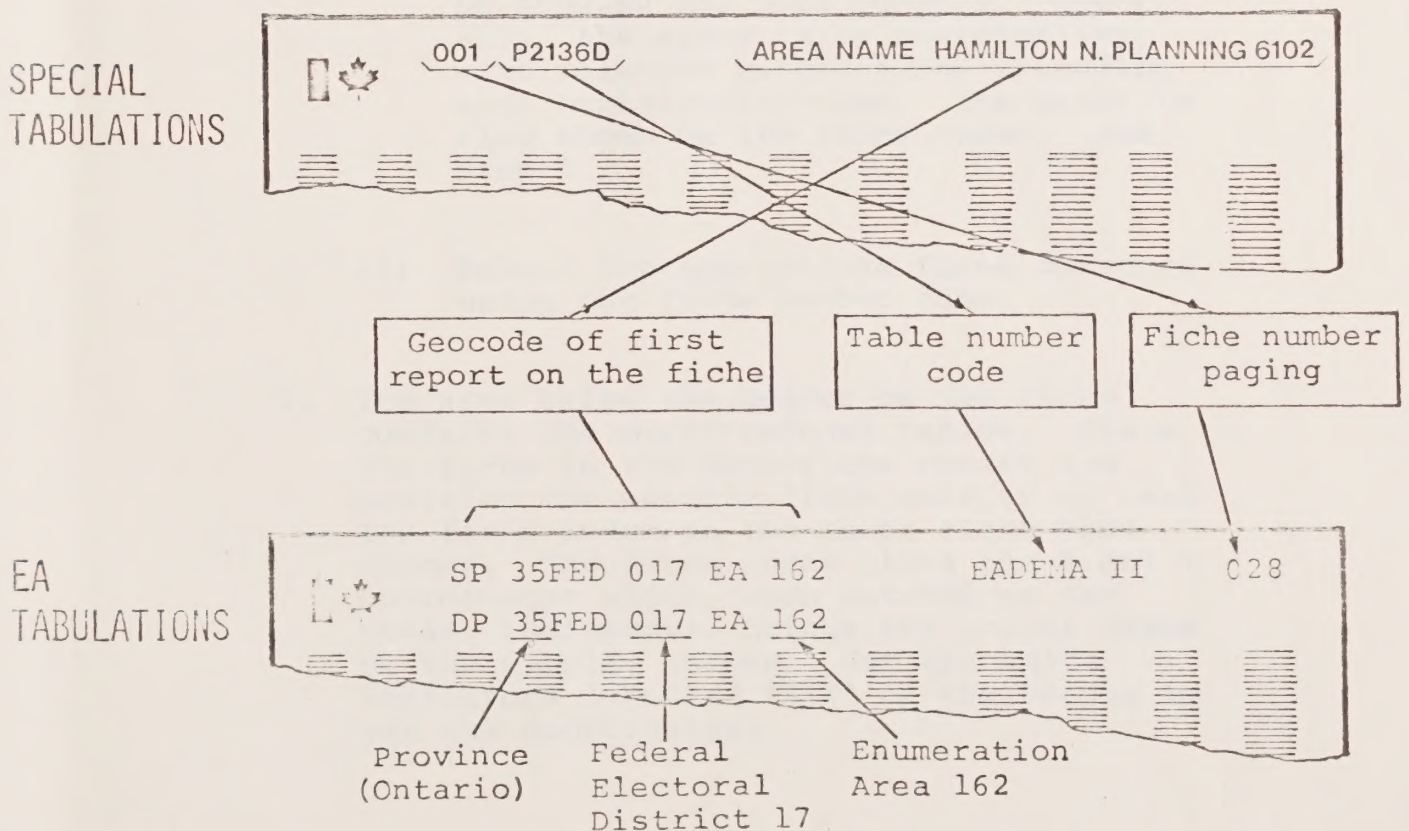

The volume of 1976 Census Tabulations is where the Census information is stored on microfiche. There are two sets of fiche each providing a different coverage of the Hamilton Census Metropolitan Area (CMA). The first set, called "Special Tabulations", includes information for municipalities, planning divisions, planning neighbourhoods, and census tracts. The second set, called "Enumeration Area Tabulations", provide the smallest area information available, the EA's.

Except for the planning geocodes found in the Special Tabulations, all areas, and subject variables are defined by standard Statistics Canada definitions. The Information Management Section keeps a number of these publications in its files that may be used for reference.

How to Locate Information

Every microfiche in the system has a header (label) that is readable by the naked eye. This information, together with the map and index references, are used to locate information.

The key information on the header, and its location on the fiche, is illustrated below.

The steps in the retrieval process are as follows:

1. Identify from the appropriate subject index the table number code. (Use Index 1A, 1B, 2A or 2B, that are included here in Volume 1.)
2. Take note of the information set, i.e. Special Tabulations or EA Tabulations.
3. Use the appropriate map reference in Volume 2 to identify the geocodes that cover the area under study.

4a. For EA Tabulations:

- i) Re-enter Index 2B with the geocodes from step 3 to identify the "fiche set" and "fiche number".
- ii) Go to Volume 3 and remove the fiche using the corresponding identifiers on the cards preceding each tabulation. The number on the upper left corner is the "fiche set" code.

4b. For Special Tabulations:

- i) The important point here is to be familiar with the order of reports since most tabulations are totally contained on one fiche. Table 1, following these instructions, should be studied for this purpose. Generally, the order is by municipality, with relative subdivisions preceding each municipality name. The order is also shown on the fiche index. See Step 5.
 - ii) Select the appropriate fiche directly using the fiche number code.
5. The area below the header on the fiche contains the micro-reduced tables. Place the fiche in the microfiche reader and position the movable fiche carrier to read the fiche index in the lower right-hand corner. The fiche index gives the X and Y coordinates which, when matched on the reader indicators, brings the proper table on the display screen. Use the white indicators labelled "48X" on the reader to set the coordinates.

6. After use, replace the fiche in its original position in the fiche holder.

ADDITIONAL INFORMATION

Microfiche Readers

Valiant 14 readers are located in the Planning Department as part of this system; one unit in City Hall and one in Century 21.

How to Load and Read Fiche

To load a fiche in the carrier, pull the carrier forward until the upper glass opens and the carrier stops. The glass flats will remain open for fiche loading. Insert the fiche between the glass flats so the film is all the way to the back of the carrier and against the right guide rail. Push the carrier back in for reading.

The readers are supplied with two lenses for readbacks of 48 and 24 times reductions. The "F" lens should be used for this system.

For a sharp, clear image, turn the ribbed focus ring on the top of the lens around.

Consult the "Operating and Maintenance Instructions" manual for other instructions, or call the Head of Information Management Section in the Century 21 Planning Office. A copy of the manual will be attached to Volume 3 on the inside back cover.

Note: After use always make sure the main power switch is turned off to conserve the lamp.

Index References

Index 1A and 1B are used to describe the Special Tabulation series. Index 2A and 2B describe the Enumeration Tabulations. The "A" subscript indexes in each series denotes an overview listing of all

tabulations. The "B" subscript indexes provide details of variable classifications, and give relationships between geocodes and fiche numbers.

Index 2B should prove to be particularly useful since it identifies all enumeration areas within Hamilton CMA municipalities.

Copies

At the present time the Planning Department does not have the facilities to produce photocopies of the fiche data. If it becomes necessary to have copies, arrangements can be made with a vendor for full scale prints, or copies may be made on the microfilm printer in the Engineering Department. For the Engineering prints, the Head of Drafting Services should be contacted on the 7th Floor in City Hall. Engineering prints will be at half size but still readable.

Example Retrieval

It is required to obtain labour force information, by sex, for the Gibson neighbourhood and the City of Hamilton.

Solution:

- Step 1. Neighbourhoods are included in Special Tabulations set. Reference is made to Index 1A and table name "P21363E" is identified in "fiche set 5". The variable classes are then checked in Index 1B to assure the level of detail is as expected.
- Step 2. Identify Gibson neighbourhood by geocode from the map reference in Volume 2, i.e. 6607.
- Step 3. Identify the fiche numbers for Gibson and Hamilton from Index 1B using the order given in Table 1, i.e. Gibson-Fiche No. 1 Hamilton-Fiche No. 2.

Step 4. Remove the identified fiche from the "Special Tabulation" section in Volume 3 and place one of the fiche in the reading position on the reader. Refer to the index in the lower right-hand corner.

Step 5. Record the coordinates of the required tabulations.

i.e. Gibson (6607): C-09, Fiche #1

Hamilton City: N-05, Fiche #2

Step 6. Set fiche coordinates C-09 and N-05 using the 48 times reduction scales to obtain the tabulations on the screen.

Table 1.

SPECIAL TABULATION - REPORTING SEQUENCE

<u>Geographic Area</u>	<u>Level of Statistical Reporting</u>
1. Hamilton	i) Planning Neighbourhoods 6102 to 7611. ii) Planning Divisions 6100 to 7600 positioned with corresponding neighbourhood codes. iii) City of Hamilton (0903).
2. Stoney Creek	i) Census Tracts 80 to 86 ii) Town of Stoney Creek (0902).
3. Dundas	i) Census Tracts 130 to 133 and 141. ii) Town of Dundas (0904).
4. Flamborough	i) Planning Divisions 1100 to 1500. ii) Township of Flamborough (0951).
5. Ancaster	i) Planning Divisions 3100 and 3200. ii) Township of Ancaster (0896).
6. Glanbrook	i) Planning Divisions 4100 and 4200. ii) Township of Glanbrook (0952).
7. Hamilton CMA	i) Hamilton-Wentworth Region (0025). ii) City of Burlington (0238). iii) Town of Grimsby (0458). iv) Hamilton CMA (0537).
